

# Holly Lodge Primary Academy Provision Map 2024-25

Through this Provision Map we have outlined a range of support that some of the children in our academy may require during the school year, though this may be adjusted to cater for changing needs and it is provided subject to budgetary constraints. The Provision Map is split into the four categories of need as outlined in the Code of Practice 2014 (Communication & Interaction, Cognition & Learning, Social, Emotional & Mental Health, Sensory & Physical). It follows a graduated response approach, in line with the Surrey Profile of Need.

Universal describes high-quality inclusive teaching which considers the learning needs of <u>all</u> the children in the classroom. This includes providing differentiated learning and creating an effective, inclusive learning environment. This is the first step in responding to children who have or may have SEND.

#### Universal

### Inclusive Quality First Teaching for all children

Targeted provision describes specific, additional and time-bonded interventions provided for some children who need help to accelerate their progress to enable them to work at or above age-related expectations. This support/intervention is targeted to children who are not making the expected progress through the universal provision. Some children's needs may also be being supported through involvement of external agencies. Children may be on the SEND Register at SEND Support level (in line with Surrey, this may be School SEND Support or Specialist SEND Support).

## **Targeted provision**

Additional support/interventions to enable children to 'catch-up' and reach age related expectations

# Personalised provision

Additional and highly personalised provision to enable access to the curriculum

Personlised provision describes targeted provision that is needed for a <u>few</u> children where it is necessary to provide highly tailored intervention to accelerate progress and/or enable children to achieve their potential. This may include one-to-one or specialist interventions. Children will be on the SEND Register at either SEND Support level or may require statutory assessment/have an EHCP.

This version of the Provision Map is correct as from October 2024 and may be subject to change. It will be reviewed annually.
